

About EcoSMEnergy

The EcoSMEnergy project aims to offer a holistic solution to address energy challenges in SMEs within NACE code sectors C20 to C22 and C25 to C29, with tangible impacts on energy efficiency and sustainability, while aligning with EU directives focused on energy efficiency and promoting clean energy transitions.

Its primary objective is to enhance energy efficiency and sustainability of SMEs in the targeted sectors by means of a broad range of activities that deal with challenges related to energy efficiency, lack of awareness, motivation, or access to financial solutions.

**Co-funded by the
European Union**

**Enhancing energy
efficiency and
sustainability among
small and medium-
sized enterprises
(SMEs) operating
within NACE codes
C20 to C22 and C25
to C29**

EcoSMEnergy Outcomes and Impact

To overcome key barriers such as limited knowledge, financial constraints, and complex support systems, the EcoSMEnergy project provides a range of services including energy auditing, real-time energy monitoring tools, and comprehensive training workshops.

These initiatives aim to equip SME staff with the skills necessary to manage energy use efficiently and support the implementation of EnMS. The overall impact is twofold: improved energy efficiency for SMEs, and a positive contribution to the EU's climate goals.

Through its various activities, the project foresees the following results:

Benefits for SMEs from the EcoSMEnergy:
